## new products

continued from page 6

### A/C Unit

A high-efficiency air conditioning unit designed primarily as a replacement for aging and less efficient through-the-wall room air conditioners, has been announced. It is expected to have

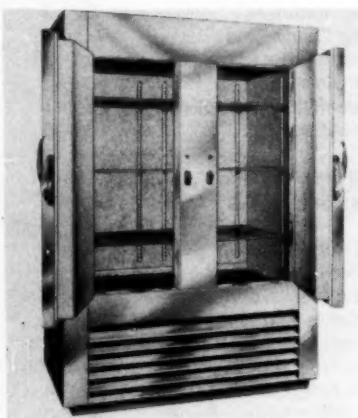

strong appeal for building owners and managers seeking to cut operating costs and to upgrade tenant comfort without incurring the expense of structural alterations.

Two basic chassis sizes are employed, both of which are fully compatible with the two standard wall sleeves employed for the company's through-the-wall air conditioners.

Major features are reduced operating cost, low first cost and quiet operation. All of these air conditioners employ the company's new rotary compressor. For further information contact **Feeders Corp.**, Dept. RSC-12, Edison, NJ 08817.

### Refrigerator

A large 20 cubic foot, two door refrigerator has been added to the growing line of refrigeration products manufactured by this company. Designed to meet many commercial refrigeration requirements—stores, restaurants, schools, industrial, and institutional cafeterias—the new model may be modified for use as a safe, controlled biological refrigerator, or as a freezer.

Compressor-condenser assembly is self-contained and pull-out mounted for service accessibility. Heavy gauge steel exteriors are finished in baked white acrylic enamel (optional):

stainless steel). For more information write to **Nor-Lake, Inc.**, RSC-12, Second and Elm, Hudson, WI 54016.

### Mobile Radios

Substantial new improvements in inner circuitry and performance are reported in this new solid state series of FM mobile radios and base stations.

Mobile units up to 100 watts are available in low band, high band and ultra high frequencies (UHF).

Stations include desktop and wall models with a broad selection of options and accessories to meet most systems requirements. Simplified modular construction contributes to easy serviceability. Plug-in interconnection allows change of modules without soldering. For further information write **General Electric Co.**, (RSC-12), Mobile Radio Dept., Section P, P.O. Box 4197, Lynchburg, Va. 24502.

### Urethane Tape

A brand new double sided super strength urethane tape for mounting air conditioning controls was recently introduced. The company states that the new tape will mount anything to anything and will save contractors many hours of drilling and screwing when installing thermostats and other controls. Just one square inch holds one pound.

The tape is not affected by heat, cold or moisture. The company also states that the longer it's up, the stronger it gets. This new tape is designated model No. AT-16. Contact **Wagner Products Corp.**, Dept. RSC-12, 19094 N.E. 4th Court, N. Miami Beach, FL 33179.
